DETAILED ACTION

1. Applicant's Preliminary Amendment filed 10/08/2004 has been reviewed and placed of record in the file.

Allowable Subject Matter

2. Claims 1-19 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a semiconductor device and a method for manufacturing thereof having all exclusive limitations as recited in claims 1, 6, and 13, comprising a first film and a second film sequentially laminated over a substrate, the first film and the second film each having at least a layer of an insulating layer, a conductive layer, and a semiconductor layer, the conductive layer of the first film and the conductive layer of the second film being in contact with each other and having the same pattern.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copies of the references are not being furnished with this Office Action per MPEP § 707.05(a).

a) U.S. Patent 6,372,608 to Shimoda et al. discloses a method for transferring a thin-film device onto a transfer module - the thin-film device including a separation layer and a substrate - comprising irradiating the separation layer with light from the substrate side and detaching the substrate.

b) to Marumoto et al. discloses a display device having a first substrate and a second substrate, the first substrate attached to the second substrate with a conductive pattern in between.
